DEVELOPMENT

GROSS MOTOR

# PROGRAM STRUCTURE

THE INFANT PROGRAM  
takes place on Tuesdays and  
Thursday mornings from 9:30-12  
at our centre at 36 Atkinson ave.

Classes typically have 4-8 infants at a time  
and our bright, cheerful infant program room  
is inviting for both parents and children alike.

Caregivers attend with babies  
and rotate through a variety  
of therapeutic activities. 1:1  
and group therapy is provided  
with an emphasis on parent  
training and consultation.

# OUR APPROACH

Our approach is holistic and child-centred.

The trans-disciplinary Infant Intervention team is comprised of: an early interventionist, speech pathologist, physiotherapist, occupational therapist, music therapist and a social worker.

The caring and supportive team empowers parents by providing them with the tools and strategies they need to further enhance growth and development. The team focuses on the unique needs of each infant and child and specific goals are incorporated into all individual and group activities. An informal assessment is conducted soon after the child joins the program and goals are re-assessed throughout the year and again at the end of the program.

# ADMISSIONS

## CALL INTAKE FOR A FREE CONSULTATION

We invite you to come and discuss your baby's areas of need and hear how we can help. We encourage parents to bring in any assessments or diagnostic information.

To book: [www.kaylaschildrencentre.org/intake](http://www.kaylaschildrencentre.org/intake)  
or call 905 738 5542

## BOOK A CLASS VISIT

Bring your baby in and try a class! our clinical team will observe and interact with your baby in order to give recommendations on necessary interventions.

## APPLY

An application form can be filled online and payment plans can be made for monthly instalments where necessary.

To book: [www.kaylaschildrencentre.org/student-application/](http://www.kaylaschildrencentre.org/student-application/)

## WHEN SHOULD INFANTS BE REFERRED TO KCC?

**When there are concerns in more than one area of development, infant intervention can be very beneficial.** Call us if you or your child's paediatrician are concerned about motor, **speech and language or cognitive delays.**

**We also cater to children who are medically fragile or who have gone through extensive medical procedures and we can accommodate the needs of infants who are immuno- compromised.**
